schacht / aslani architects
The proposed NSCC Student Center will provide a number of benefits to students. It will be located in the middle of the campus, adjacent to the Technology Building and the Courtyard. This central gathering point, enhanced by additional services for students, could create a hub of campus activity and promote a stronger sense of community.

Potential features of the proposed Student Center include:

- Study balcony
- Business Center (with photocopiers, fax machine, computers, etc.)
- Convenience Store/Grab & Go Food
- Dining area
- Newstand
- Recreation Center with game and club rooms
- Student Leadership offices
- Multi-use space for speakers, concerts, special events, etc.
- Informal study and meeting spaces
- Proximity to the planned tutoring center will help encourage use of these student support services
- A total of 21,550 square feet of additional space to serve student needs

**Project Cost:**
$10 million

**Cost to Students:**
$6 million

**Cost Per Student:**
$3 fee per credit hour for students taking 5-15 course credits

Students taking less than 5 credits will not pay the fee.

Students taking more than 15 credits will not pay the fee on credits over 15.

Students who only take online courses will not pay the fee. International students will contribute to the building through a transfer of tuition revenue rather than an increase in fees.

**Fee Timeline:**
If approved, this fee will be charged to all applicable students starting in winter quarter 2010 and will be paid by students over the next 20 years.

**Construction Timeline:**
Construction on the Student Center would begin in spring 2011 and be completed at the end of 2012, at the same time as the renovation of the Technology Building. While many current students may not benefit from the Student Center during their time at North, they will be contributing to the campus life of future students.

**Student Input:**
Prior to construction, student representatives will provide input to the architect, project manager and college administration about specific features of the Student Center.
