

ASSOCIATE OF SCIENCE DEGREE REQUIREMENTS

Effective Summer 2004

Program Code: 0012

The Associate of Science degree is designed to fulfill the general education requirements for most four-year degrees in arts and sciences and, at the same time, provide the student with an opportunity to concentrate in a major area of study in math or science.

The Associate of Science degree is a transfer degree, however there are certain major areas of study where the student may not be able to take the courses necessary in order to transfer with junior standing. It is important to consult with an academic advisor, faculty in a student's major and the student's intended four-year transfer institution when selecting courses. **It should not be assumed that completing this degree constitutes completion of the general college or university requirements of the transfer institution.**

ASSOCIATE OF SCIENCE DEGREE REQUIREMENTS

A student wishing to earn the Associate of Science (A.S.) degree must earn 90 credits in courses numbered 100 and above with a cumulative grade point average of 2.0 or better, including grades transferred from other colleges. At least 15 credits must be earned within the Seattle Community College District college granting the degree.

Students are encouraged to meet with an advisor and consult with a faculty in their major, who will assist the student in developing a program of study in a science field such as: **biological science, chemistry, computer science, earth science, engineering, environmental science, mathematics or physics.**

Students with incoming credits from colleges or universities must request an official evaluation after registering the first time at NSCC. This planning worksheet is unofficial. Transferability of courses must be coordinated between you and the institution to which you plan to transfer. Completion of degree requirements, official evaluation requests, and graduation application are the students responsibility
